Contents of Vol. 121

Part 1

SELECTED PAPERS FROM THE FIFTH INTERNATIONAL CONGRESS FOR STEREOLOGY

Introduction 1

PAMELA DAVY. Interspersion of phases in a material 3

R. T. DEHOFF. Stereological meaning of the inflection point count 13

R. E. MILES. Stereological formulae based upon planar curve sections of surfaces in space 21

DENIS HEMON, CLAIRE A. BOURGEOIS and MICHEL BOUTEILLE. Analysis of the spatial organization of the cell: a statistical method for revealing the non-random location of an organelle 29

C. LANTUEJOUL and S. BEUCHER. On the use of the geodesic metric in image analysis 39

D. PAUMGARTNER, G. LOSA and E. R. WEIBEL. Resolution effect on the stereological estimation of surface and volume and its interpretation in terms of fractal dimensions 51

H. J. G. GUNDERSEN and R. ØSTERBY. Optimizing sampling efficiency of stereological studies in biology: or 'Do more less well!' 65

ODILE MATHIEU, L. M. CRUZ-ORIVE, H. HOPPELER and E. R. WEIBEL. Measuring error and sampling variation in stereology: comparison of the efficiency of various methods for planar image analysis 75

JEAN-LOUIS CHERMANT, MICHEL COSTER, JEAN-PAUL JERNOT and JEAN-LOUIS DUPAIN. Morphological analysis of sintering 89

J. MASOUNAVE, A. L. ROLLIN and R. DENIS. Prediction of permeability of non-woven geotextiles from morphometry analysis 99

ANDREA G. FABBRI and JAQUES MASOUNAVE. Experiments on the characterization of metamorphic textures from a micrograph of an amphibolite 111

HJ. KELLER and P. H. BURRI. Automated pattern analysis of growing rat lung

Book Review 131

Part 2

F. P. Booy, H. Chanzy and A. Boudet. An electron diffraction study of paramylon storage granules from *Euglena gracilis* 133

W. A. P. Nicholson. Electron beam current measurement in the electron microscope 141

P. Pscheid, C. Schudt and H. Plattner. Cryofixation of monolayer cell cultures for freeze-fracturing without chemical pre-treatments 149

J. Biais, M. Mercier, P. Bothorel, B. Clin, P. Lalanne and B. Lemanceau. Microemulsions and electron microscopy 169

Diana M. R. Harvey and B. Kent. Sodium localization in *Suaeda maritima* leaf cells using zinc uranyl acetate precipitation 179

Leo Wollweber, Roland Stracke and Uwe Gothe. The use of a simple method to avoid cell shrinkage during SEM preparation 185

P. M. Frederik and W. M. Busing. Ice crystal damage in frozen thin sections: freezing effects and their restoration 191

Kirk Shelley and Alexander McPherson. Spatially filtered images of *B. subtilis* α-amylase crystals 201

C. L. F. Woodcock, L-L. Y. Frado, G. R. Green and L. Einck. Adhesion of particulate specimens to support films for electron microscopy: a model system for assessing the surface properties of support films, and its application to chromatin particles 211

Short Technical Notes

Horst Piller. Checking of linearity of the photoelectric system of a microscope photometer 221

James B. McMahon and P. Thomas Iype. Adaptation of a low power stereomicroscope to scan cell colonies labelled with fluorescein isothiocyanate 225

W. Umrath. An improved technique for the freeze-fracture of cell cultures grown as monolayers 229

G. D. Danilatos. The examination of fresh or living plant material in an environmental scanning electron microscope 235

M. Van den Bosch and W. Jacob. Some modifications on freeze-fracture replica preparation 239

D. M. Woolley. A method for determining the three-dimensional form of active flagella, using two-colour darkground illumination 241

Part 3

G. H. HAGGIS. *Vicia faba* root slices examined after freeze-fracture and thaw-fixation 245

W. SANDRITTER, U. RIEDE and G. KIEFER. A simple method for the use of gallocyanin-chrome alum as an electron stain 253

A. ROSS, A. T. SUMNER and A. R. ROSS. Preparation and assessment of frozen-hydrated sections of mammalian tissue for electron microscopy and X-ray microprobe analysis 261

DEAN A. HANDLEY, JACK T. ALEXANDER and SHU CHIEN. The design and use of a simple device for rapid quench-freezing of biological samples 273

DENNIS BROWN. Polyvinyl alcohol coating: an improvement of the freeze-fracture technique 283

M. J. WITCOMB. The suitability of various adhesives as mounting media for scanning electron microscopy. I. Epoxies, sprays and tapes 289

J. VAN ZUYLEN. The microscopes of Antoni van Leeuwenhoek 309

I. AP GWYNN. Estimation of surface labelling on whole, critical point dried, cells by microprobe analysis in the scanning electron microscope 329

L. R. JARVIS. Microdensitometry with image analyser video scanners 337

B. G. H. LAMBERTY and C. B. ELLIS. An apparatus for freeze-fracturing specimens of dermal collagen in preparation for scanning electron microscopy 347

Short Technical Notes

K. ROBINSON, I. J. HARTMANN-GOLDSTEIN and D. J. GOLDSTEIN. Recording of chromosome banding with the Vickers M85/M86 scanning microdensitometer 351

R. J. SKAER and R. J. FLEMANS. The use of spectroscopic film for fluorescence microscopy 357

Book Reviews 359
